

A/V integration and support with you in mind

Design.Manage \$2500 per installation

Estimated Hourly breakdown

- 1 hour initial meeting
- 10 hours design time (includes site evaluations)
- 20 hours project management
- 8 hours of system verifications and tuning
- Up to 6 trips to your location within 1 hour of Wake county, NC

Design

Design section of the installation includes a design built around your individual needs, wants and desires for your facility. Once the design is complete we will meet again and go over the plans to determine if they are acceptable. Changes to the final design will be made at that time, once approved it will be sent out for bid to contractors of your choosing.

3A Bid Comparison (Apples to Apples to Apples comparison)

3 copies of drawings, equipment lists, and other documentation will be sent to 3 of your chosen contractors for bidding. Once the bids are received we will meet and compare the bids that were presented so that an accurate comparison can be made on price, quality plus any offered options.

Project management

- Meeting with contractors to help ensure a timely and accurate installation
- Documentation of process and weekly updates
- Site visits to check schedule, quality, and adherence to designs
- 24/7 availability for questions or concerns.

Final wrap up

- Check all connections, cable management, equipment locations, with your technician
- Provide 2 copies of as-built drawings for future references, design, and troubleshooting
- Provide all documentation of work progress
- Give the specific date of system commissioning

Additional Warranty

If you should use Brackman Consulting for all of these services, I will extended the typical 1 year warranty provided by the contractor for workmanship by an additional year. This will cover all connections, cable management, and equipment locations for cooling as it was originally installed. This will not extend to structural aspects including rigging points and hardware.

Training followup

First 2 hour annual training refresher renewal is free. Just provide lunch/dinner for your hard working techs and I'll call it even.

Schedules

I will gladly work with your schedule so that the maximum number of decision makers and techs can be at each meeting. This way everyone can be involved to be a part of the solution. I enjoy working with teams and look forward to meeting yours! Call me today and we can all get to work.
